

Muhammed Maraşlı

Muhammed Maraşlı graduated from Istanbul Technical University in 1991 with a degree in Aeronautical Engineering in the Faculty of Aeronautics and Astronautics. He has been studying for the master degree in the department of Composite Material Technology in Düzce University since 2013. His work life began in 1985 during university years by manufacturing structural frameworks and moulds. He worked as a sales engineer for concrete admixtures between the years '87 and '89. Dating from 1989, he began to work for Fibrobeton Yapı Inc. of which he is still a company partner and a member of the board. He has been working with Fibrobeton on the subject of manufacturing Glassfibre Reinforced Concrete cladding panels for 27 years. He has specialized in the designing, manufacturing and assembling of architectural cladding elements. He led the way to improve the cladding of the highrise buildings with Glassfibre Reinforced Concrete. He is still coordinating the process of innovation and R&D to develop Fibrobeton products. He also works with IMSAD (Association of Turkish Building Material Producers) for the sake of the sector and works for the cooperation between Fibrobeton Inc and University-Industry relationship. He is a member of the board of trustees for ITU Foundation, Darülaceze Foundation and Turkish Earthquake Foundation (TDV).
