

Thomas Lützkendorf is director of the Centre for Real Estate and head of Chair for Sustainable Management of Housing and Real Estate at the Department of Economics and Business Engineering at Karlsruhe Institute of Technology (KIT) – the former Karlsruhe University (TH). He holds a PhD (1985) and Habilitation (2000) in the area of implementing sustainable development principles within the property and construction sector. Within the scope of various teaching, research and consulting activities he is concerned with questions relating to the integration of sustainability issues into decision making processes along the life cycle of buildings as well as regarding the relationships between buildings' environmental quality and economic advantageousness.
