

**Arch. Ayşe Miray Şen, Msc.**

Ayşe Miray Şen is an Architect, earned her bachelor's degree in Architecture from Dokuz Eylül University in 2004. Same year, she continued to study in Master Program of Environmental Control and Building Technologies in Istanbul Technical University (ITU). Between 2005-2006, she studied in Stuttgart University of Applied Sciences as an exchange student and synchronically worked as a research assistant within the framework of a EU- funded Research Project in the same university. Upon graduation in 2007, she started her professional career in various architectural design offices as a design architect. In 2008, she began to work at Onduline Avrasya as Project Executive. Since 2012, she has been working as Coordinator in charge of the green products and sustainable development actions of Global Onduline Group.

She organized the 4th International Green Roof Congress 2015 with an international congress team. She has participated in numerous conferences & seminars as a speaker and published several articles about green roofs, solar energy and sustainable construction products. She is a part of CEN's (European Committee for Standardization) Technical Committee TC128 as the representative of Turkey. She is actively involved in major associations such as the Sustainable Committee of IMSAD (Association of Turkish Construction Material Producers). She speaks English and German.
